DETAILED ACTION

Drawings

1. The drawings are objected to because the text contained in the drawing includes terms that are unclear, as described below for the specification, e.g., "host end", "writing block" or "Seructure" (note Figure 4). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Furthermore, the brackets should be removed from the title.

3. The abstract of the disclosure is objected to because:

- (a) "large" should replace "big size";
- (b) the phrase "writing block" is unclear;
- (c) "the last page" is unclear (i.e., "last page" of what?);
- (d) it is unclear how the "logical block", "data block" and "writing block" are

distinct; one of ordinary skill in the art would recognized that logical memory blocks allowed writing of data thereto;

- (e) "latest page" is unclear (does it mean most recently transferred page?);
- (f) "with respect to" is unclear in this context.

Correction is required. See MPEP § 608.01(b).

4. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Objections

5. Claims 1-11 are objected to because they contain several errors in grammar and English idiom. In claim 1, for example, "large" should replace "big size" and "temporary data" should replace "data temporary"

Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter that was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. For example, the phrases "writing block", "last page" and "cross a page" are not properly explained in the specification. The whole concept of how a "last page" (or "latest page") is used appears to be critical to an understanding of the invention, however, this concept has not been clearly explained.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Terms such as those described in Section 7 above are undefined. Consequently it is unclear what claims such as claim 1 are about. Claim 4 is very confusing. The remaining claims are rejected for similar reasons.

Conclusion

10. It is not possible from either the specification or the claims to determine the scope of this language or to determine the metes and bounds of the claims. Due to the ambiguities in claims 1-11 as cited above, no art has been applied thereto, see *In re Steele*, 49 CCPA 1295, 305 F. 2d 859, 134 USPQ 292 (1962) and *In re Wilson*, 424 F.2d 1382, 165 USPQ 494 (CCPA 1970). The examiner will not speculate as to the intended meaning.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Peikari whose telephone number is (571) 272-4185. The examiner is generally available between 7:00 am and 7:30 pm, EST, Monday through Wednesday, and between 5:30 am and 4:00 pm on Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Kim, can be reached at (571) 272-4182.
